Fetch product by ID

/product/:id

The screenshot shows a web browser's developer tools interface. At the top, a GET request is made to `https://grocery-app-server-8o3xk.ondigitalocean.app/product/`. The Headers tab is active, showing an Authorization header with the value `Bearer ((Grocey Server Bearer))`. The Body tab is also active, displaying a JSON array of product data. The status bar indicates a 200 OK response with a 122 ms response time and 4.36 KB of data.
